29th October 2019

Dear parents/carers,

This is to tell you about an exciting morning of activities we have planned for Year 6 pupils from across the Academy Trust tomorrow. We are participating in a STEM Day, giving students an opportunity to partake in activities involving aspects of science, technology, engineering and maths. It is also an opportunity for children from all four schools to work together while taking part in a number of fun and challenging activities.

Children from each site will leave school at approximately 9.30am and either walk to one of the schools, or get the 468 bus. They will be accompanied by their teachers and teaching assistants. Travel is free for them so no money is needed. The morning will consist of a quick warm-up followed by a science challenge. The challenge will involve children having to use resources to create the most stable bridge that they can. They will need to work as part of a team and apply their scientific knowledge in order to win the competition. After a short break, the next activity will be 'Big Maths' in which the children will need to work out how many blades of grass there are on their school field. The activities are designed to be fun and interactive, whilst also challenging them to use their existing skills in various subjects. The children will then be returning to their respective schools at 12.00pm so that they are back in time for lunch.

We look forward to updating you with photographs on the website.

Thank you,

The Year 6 Team
