

# The Red Deer Facts!

Red deers have the largest antlers, in Uk there are 360,000 Red Deers and they go 30-35 mph. Red deers were first ever found about 4 million years ago! Wow, that's a long time ago!! They are the largest of over deers.

## Food/lifespan

Red deers eat a variety of food: grass, rushes, sedges and herbs. Red deers (they grow up to 2.1m) are the largest deers in uk. They live for 20 years and when they die they sadly get eaten up.

## Habitat

Scanning the woodland, you would see them in the open air. As tall as the sky scraper, the trees tower over the red deers. In the unknown forest, they scoured the ground for food.

## Crazy Facts

Mostly in the woods they die and sadly get eaten up. Male deers are called “Fawn”; females called “Hind” and baby deers are called “fawn” as well as the females. They jump high as 2.1 mph, male deers are **dangerous** - during the falling season-
