

# Science: Living, Dead or Never Alive

You could print off and use this sheet to record your ideas, or you could just use a piece of paper and record your work in your own way.

Take a walk around your home, and if you have one, your garden. What things can you see that are living? What about things that are dead? Finally, what about things that were never alive? Don't forget to think about MRS GREN to help you!

Draw or write some of the things you discover in the table below.

Living	Dead	Never Alive

**Challenge:** Can you explain how you know?

For example: I know \_\_\_\_\_ is living because \_\_\_\_\_.
