

Monday 10th October 2022

WALT write a non-chronological report.

## Appearance

A Diplodocus is 6m tall  
if it needed to eat on top  
of trees. Some dinosaurs  
use their tail as a weapon  
whipping it back and forth.

## Diet

When a Diplodocus was  
hungry it used to eat 50  
kg a day on top of  
trees.

## Habitat

Stegosaurus's lived in  
undergrowth of the subtropical.  
Some dinosaurs bury their  
eggs underground to keep  
them warm.

## Lifestyle

Dinosaur's eggs take  
3-6 months to ~~hatch~~  
hatch and now babies  
come out of it. When a  
Diplodocus is ten years  
old it means their run  
adult. When a Diplodocus  
is too big that means it  
can't fit on it's eggs.

## Fun Fact

A Jurassic period is  
145-155 million  
years ago. Did you  
know that Saurapods  
are in the Jurassic  
period! Did you  
know that Triceratops  
lived 65 million years  
ago.
