

Appearance

Stegosaurs had a row of 90cm long spikes to defend themselves against other vicious predators. The Stegosaurs had diamond shaped plates on its back to defend itself and its young from carnivores.

Habitat

Stegosaurs lived in places like Africa, South America, and some parts of Europe.

Fun Fact

The Stegosaurs lived 150 million years ago in the Jurassic period. That means that it lived before the Tyrannosaurus-Rex. Because the Tyrannosaurus lived 60 million years ago.

In the cretaceous period

Diet

The Stegosaurs was a herbivore and mainly ate 50kg a day of plants, leaves and vegetables. Yes they actually ate vegetables. If the Stegosaurs can't reach trees it would knock them down.

Lifestyle

The Stegosaurs was a very quiet dinosaur. But if a carnivore tried to attack itself or its young it would battle and protect itself.
