

**Friday**

**What is the question?**

Helpful Hints:

- Try to use a variety of operations; addition, subtraction, multiplication and division
- Use your number facts
- Partition the number into combinations of tens and ones

If my answer is 36, what could the question be?

Examples:

$$10 + 26 = 36$$

$$6 \times 6 = 36$$

$$50 - 14 = 36$$

$$10 + 20 + 6 = 36$$

If my answer is 18, what could the question be?

If my answer is 50, what could the question be?
