

fig. the features of a river

represents the outside bend and the inside
represents the water rushing in together.

The outside of the river
AKA the land.

collapsed
section
of river
cliff.

lateral
erosion.

The yellow bit
represents the land
lost to the river eroded.

The arrows shows
the fastest current
of the water.

Similar to an oval lake

Did you know that
when the water is
coming really fast
it could cut off the bank
that it is coming from?

The purple bit is the
land gained from the
river
