

Amelia

Dear Sir/Madam,

My name is Cherry Blossom and I am writing to inform you that our world is slowly dying. These nasty creatures have got rid of my beautiful, beloved greenland and have done it to many more!

It was lovely before. The bees were buzzing. The flowers swayed in the light breeze and the breeze was fresh. The birds danced together in the big, bulky trees and it was peaceful and silent. A bunch of children always ran on the endless supply of greenery. They'd play "it" and sweep up the bright, autumn leaves.

NOW it's full of toxic and polluted gases. If they stay the world is going crumble. You should really watch David Attenbrough. If this is the modern world and it's starting now, then: What's the world going to be like in ten years time. We have to spread awareness of what's really happening. It's time to step up!

You can't see the blue skies anymore it covered in thick fog. I WANT THEM GONE! Where are the plants. The smell of cut grass. Do you really want to spend the rest of your life like this? Now it's covered in hard rock and fake trees everywhere

Good
bye!
