

Dear Sir / Madam,

I am writing to you to inform you about an urgent Complaint. The varmints are building a maze of cities on our land which was once a place full of life and hope! But now it is a place roaring with noise. While wirey grass was scraped away and the nature of this world was lost, you were just sitting there doing nothing about it. Most of the animals will be dead because you aren't doing anything to help.

Before the varmints came, the world was an oasis of tranquility. The bees buzzed, in the cool, dark earth the moles would murmur and flocks of beautiful birds would soar gracefully over the golden grass, as they filled the skies with their sweet melodies.

Now the world is a living nightmare. All has been lost. The nature, the moles, the bees and the birds. They're all gone! My kind is now facing extinction because of those obnoxious varmints! It's not just my kind, everyone is under threat. The pollution is poisoning our land and we have no more wilderness, nothing left to tend to. It has all been destroyed.

I would suggest you fix this problem by demolishing the cities and bringing back the nature back. We need to stop the pollution and kick the varmints out. All our lives depend on this! I hope you have read my letter with care and have taken everything into account.

Yours sincerely,

Carl
