

O: First we decided to make St John's church. We wanted to make something hard. We used a few boxes together with white glue.

H: Then we decided to make the clock tower because it was too hard. First we made the joins.

L: It was difficult to make this bit (the joins on the sides). Next we are going to paint it.

L: We chose to do Crystal Palace train station. The only reason was that my sister T was on the photograph.

E: We wanted a challenge.

B: We took the box inside out, sellotaped the sides. Then we will draw T.

I: We made Sainsbury's. We knew everything else would be too easy! We had 2 cardboard boxes stuck together. We cut out the windows.

J: We thought that would be easy. We needed a cylinder and stuck it on the box and I stuck on the windows.

K: Now we just need a roof and we need little parts on it, everywhere.
